About us

CERT.GOV.PL TEAM

The Governmental Computer Emergency Response Team CERT.GOV.PL acts as a core CERT team responsible for coordination of emergency responses for computer incidents within the government administration and critical infrastructure sector. One of its main responsibilities is to recognize, prevent and detect security threats against IT systems that have key role in ensuring continuity of public administration bodies as well as ICT networks that are covered by the unified registry of objects, installations, devices and services defined as critical infrastructure and also ICT systems belonging to owners and holders of objects, installations, devices and services defined as critical infrastructure which are mentioned in article 5b, paragraph 7, point 1 of Crisis Management Law of 26 April 2007.
